Equine Health Rules and Requirements

All animals showing clinical signs of contagious, infectious, or parasitic diseases will not be admitted to any show or other fair event.

All drug and vaccine labels directions must be followed, including but not limited to milk and slaughter withdrawal periods. The vaccine must be administered at least 15 days prior to entry into the fair.

PA Equine Requirements:

1. A Certificate of Veterinary Inspection (CVI) issued after May 1, 2022 is required.
2. All animals must be free of infectious and contagious diseases and a statement of this is required on the CVI (the statement is pre-printed on the CVI).
3. All equine animals must be test negative for EIA by an official test within the 12 months prior to the opening date of the exhibition. Laboratory test results must accompany each animal to its final destination (a copy of the original lab report is acceptable). Foals less than six months of age accompanied by a dam which meets the above requirements are exempt from EIA testing requirements. If the foal is not accompanied by the dam, a copy of the dam's test results must accompany the foal to its final destination.
4. A current rabies vaccination administered by a licensed veterinarian is required for animals three months of age and older. However, if a mare was currently vaccinated against rabies when she foaled, the foal is not required to be vaccinated until six months of age, with a second vaccination administered two-four weeks later. All vaccine label directions must be followed, and all rabies vaccinated equine animals must be accompanied by a rabies vaccination certificate or the vaccination information must be included on the CVI. The certificate must contain legible name and contact information of the veterinarian who administered the vaccine and the veterinarian's signature. A copy of the original rabies vaccination certificate is acceptable.

Out of State Equine Requirements:

1. A Certificate of Veterinary Inspection (CVI) issued within the 30 days prior to the date of the importation is required. If an animal comes from a state in which Vesicular Stomatitis (VS) has been identified, or a bordering state, the CVI shall include a statement verifying that "all animals identified on this certificate of veterinary inspection have been examined and found to be free from Vesicular Stomatitis (VS). During the past 90 days, these animals have neither been exposed to VS nor located within 10 miles of a site where VS has been diagnosed."
2. All animals must be free of infectious and contagious diseases and a statement of this is required on the CVI (the statement is pre-printed on the CVI).
3. All equine animals must be test negative for EIA by an official test within the 12 months prior to the date of importation. Laboratory test results must accompany each animal to its final destination (a copy of the original lab report is acceptable). Foals less than six months of age accompanied by a dam which meets the above requirements are exempt from EIA testing requirements. If the foal is not accompanied by the dam, a copy of the dam's test results must accompany the foal to its final destination.
4. A current rabies vaccination administered by a licensed veterinarian is required for animals three months of age and older. However, if a mare was currently vaccinated against rabies when she foaled, the foal is not required to be vaccinated until six months of age, with a second vaccination administered two - four weeks later. All vaccine label directions must be followed, and all rabies vaccinated equine animals must be accompanied by a rabies vaccination certificate or the vaccination information must be included on the CVI. The certificate must

contain legible name and contact information of the veterinarian who administered the vaccine and the veterinarian's signature. A copy of the original rabies vaccination certificate is acceptable.

5. If an equine animal has resided in a state in which Piroplasmiasis has been identified within the past five years for a cumulative total of 30 days or more within the six months preceding the date of entry into the Commonwealth, that animal must be test-negative for Piroplasmiasis on a competitive enzyme-linked immunosorbent assay (c-ELISA) test, or a Department-approved equivalent test, with the test occurring within the 30 days preceding entry into Pennsylvania. The written laboratory test report, confirming compliance with the requirement described above, shall accompany the equine animal in transit to a destination within the Commonwealth of Pennsylvania; and the date of test and the test results shall be written on the Certificate of Veterinary Inspection.
